

REPUBLIC OF OLD SOULS  
LIBERTAS

# THE FARMER'S GREAT DEFENCE

---

## Playing the Game of Monopoly with Intelligence

MAKE THE GREAT ESCAPE  
FROM THE MATRIX

**IAIN CLIFFORD**

The President of the  
Republic of Old Souls.

Farmers today are standing at a crossroads. Around the world, governments are tightening restrictions, enforcing new policies, and threatening to seize farmland that has been in families for generations.

The truth is that the government already holds legal title to farms through Crown registration.

The farmer merely appears to “own” the land, but in reality is a tenant under acts, statutes, and corporate law.

The way forward is not to fight harder under the same system – it is to **play the Monopoly game more intelligently.**

That is where the **Great Escape Protocol** becomes the farmer’s greatest ally.

## STEP ONE:

## DISCHARGE AND RECOUP

The first step for farmers is to **discharge all debt** tied to the farm.

- **Mortgage debt** can be voided and discharged using the **Mortgage Liberation Protocol**, which exposes the fraud in the original mortgage contract and tenders a Bill of Exchange to settle the debt.
- Once discharged, the farmer can then **recoup the mortgage face value** using the **Mortgage Redemption Protocol**.
- In addition, **all mortgages since 2001** can be recouped as abandoned credit, and **bank payments from the last three years** can be reclaimed using the **Infinite Money Protocol**.

This means the farmer is no longer dependent on farm cash flows for survival. They will have access to new streams of recouped credit to stabilise their family and operations.

## STEP TWO:

## MULTIPLY CREDIT RECOUPMENT

For farmers with significant credit to recoup, the **Advanced Currency Creation Protocol** offers the ability to **multiply their recouped credit threefold every year**.

By cycling recouped funds through church envoy trusts, credit expands into long-term, rolling returns for the next 25 years.

This transforms the farmer from being dependent on unpredictable harvests or fluctuating commodity markets into someone with a **stable financial base** that cannot be taken away.

### STEP THREE:

## PROTECT THE FARM FROM GOVERNMENT OVERREACH

The real danger farmers face is government intrusion. Through environmental rules, emission caps, water regulations, and taxation, governments are deliberately pushing farmers to the brink.

The remedy is the **Envoy Protocol**. By becoming a **Church Envoy** and occupying the office of General Executor, the farmer separates themselves from the corporate fiction (the registered name on the birth certificate).

This:

- Removes government jurisdiction over the living man or woman.
- Shields the farm by holding it in a **Private International Trust (Asset Shelter Protocol)**.
- Converts the farm into a **church ministry and independent nation**, outside the reach of Crown statutes.
- Provides diplomatic protections, including the ability to escalate violations to the **European Court of Human Rights**.

Once the farm is sheltered, **no government agency has legal standing** to enter or seize it. Any attempt to do so becomes trespass.

By invoking the **Envoy Protocol** and structuring the farm as an **auxiliary church ministry**, the farmer elevates the land into an **independent, self-declared nation**.

Not only is the farm secured in **fee simple title** within a **Private International Trust**, but its very status as a church nation places it beyond the jurisdiction of Crown acts and statutes.

As the **Envoy of their own church**, aligned with the Republic of Old Souls, the farmer holds diplomatic standing that shields both the land and themselves.

This means the government has **no lawful right to trespass, regulate, or impose taxation** on the farm.

Any attempt to do so would violate international protections and amount to unlawful interference with a sovereign nation.

# FROM DEBT-BURDENED FARM TO AUXILIARY CHURCH NATION

## A Step-by-Step Path for Farmers

### STEP 1: DISCHARGE FARM DEBTS

- Use the Mortgage Liberation Protocol to void and discharge any existing mortgage contracts tied to the farm.
- Tender a Bill of Exchange to lawfully settle outstanding liabilities.
- Recoup the face value of the mortgage through the Mortgage Redemption Protocol, converting debt into credit.

### STEP 2: RECOUP ABANDONED CREDIT

- Claim all mortgages since 2001 as abandoned credit.
- Recoup bank payments from the last three years using the Infinite Money Protocol.
- These recovered funds ensure the farmer is no longer dependent on unpredictable farm cash flows for survival.

### **STEP 3:**

## **MULTIPLY CREDIT RECOUPMENT**

- Enter the Advanced Currency Creation Protocol.
- Cycle recovered credit through envoy trust structures, multiplying recoupments by a factor of three each year.
- Build a long-term, stable financial base for the farm and family, independent of government subsidies or banks.

### **STEP 4:**

## **ESTABLISH THE FARM IN A PRIVATE INTERNATIONAL TRUST**

- Transfer the farm into the Asset Shelter Protocol, securing it in fee simple title.
- This removes the Crown's registry claim and ensures the land is shielded from taxes, creditors, or government seizure.

### **STEP 5:**

## **DECLARE THE FARM AS AN AUXILIARY CHURCH**

- Through the Envoy Protocol, the farmer becomes an Envoy of their own church ministry under the Republic of Old Souls.
- The farm is declared an auxiliary church and an independent self-declared nation.
- This status places the farm beyond the reach of acts, statutes, or Crown regulation.

## STEP 6:

## PROTECT WITH INTERNATIONAL STANDING

- As a Church Envoy and Diplomat, the farmer holds standing under international law.
- Any attempt by the government to interfere is unlawful trespass, and may be escalated to the European Court of Human Rights or other international jurisdictions.

## THE OUTCOME

The farm is no longer just land under the control of the Crown. It is:

- Debt-free,
- Credit-rich,
- Sheltered in private trust, and
- Recognised as a sovereign auxiliary church nation.

The farmer has risen from being a tenant in a feudal system to being a sovereign steward of the land, protected by trust law, international law, and their own diplomatic standing.

# THE TWO PATHS: POOR PETER VS INFINITE IAN

## Poor Peter the Farmer

- Continues paying mortgage and tax.
- Obeys every statute and permit restriction.
- Risks losing the farm or even facing jail when regulations are breached.
- Retires with nothing truly owned, as the Crown retains legal title.

## Infinite Iain the Farmer

- Voids and discharges the farm mortgage.
- Recoups all past mortgages (2001 onwards) and bank payments.
- Holds the farm in **fee simple title** inside a private trust.
- Operates free from statutes and taxes.
- Multiplies credit through **Currency Creation Advanced**.
- Secures international protection as a **Church Envoy and Diplomat**.

# CONCLUSION

The farmer's future lies not in resistance within the system, but in **mastery over the system**. The Great Escape Protocol gives farmers the tools to discharge debt, recoup credit, protect their land, and rise above government overreach.

The choice is stark:

- Remain trapped in feudal tenancy under government policy.
- Or step into sovereignty, shielded by trust law and international standing.

The *Farmer's Great Defense* is clear: play the Monopoly game with intelligence, and win.
