

REPUBLIC OF OLD SOULS
LIBERTAS

THE FARMER'S GREAT DEFENCE

Republic of Old Souls –
Freedom for the Land,
Freedom for the Farmer

IAIN CLIFFORD

The President of the
Republic of Old Souls.

Chapter 1: The Monopoly Game of Deception

Farmers are forced to play a rigged game. The Crown system treats you as a tenant, not an owner, under its Monopoly board of commerce.

- Mortgages and taxes drain your wealth.
- Regulations dictate how you farm, what you grow, and how you trade.
- New statutes, pushed under UN Agenda 2030, threaten to close family farms altogether in the name of “sustainability.”

The rules are written so that the farmer never wins.

Chapter 2: The Securitisation of the Birth Certificate

From birth, a bond was created in your name. The birth certificate was securitised and traded. This “legal person” — not the living wo(man) — is what the government regulates.

- All mortgages, taxes, and fines attach to this artificial estate.
- By assuming you are this legal fiction, the system traps you into endless obligations.
- Understanding this deception is the first step in escaping the net of statutes and controls.

Chapter 3: The Great Escape Protocols for Farmers

The Republic of Old Souls provides the remedy through its flagship Great Escape Protocols. For farmers, four are especially vital:

1

Mortgage Liberation Protocol

- Discharge fraudulent farm mortgages.
- End the threat of foreclosure and debt slavery.

2

Infinite Money Protocol

- Recoup abandoned credit from mortgages.
- Recover bank payments and cycle them annually for ongoing abundance.

3

Asset Shelter Protocol

- Place your farm in a Private International Trust.
- Hold it under fee simple title.
- Convert the land into church land – immune from state jurisdiction.

4

Envoy Protocol

- Become a Church Envoy of the Republic of Old Souls.
- Enjoy diplomatic protection from statutes, acts, and legislation.
- Access superior legal standing and financial facilities worldwide.

Chapter 4: Two Farmers, Two Futures

Poor Peter the Farmer

Peter stays on the Monopoly board.

- He pays debts on a fraudulent mortgage.
- He loses income to taxes and penalties.
- He must comply with every new Act, statute, and regulation.
- His farm is at constant risk of being closed down under Agenda 2030 policies.
- His land can be seized or controlled at any time.

Peter works hard, but the system controls his future.

Infinite Ian the Farmer

Ian steps off the board and claims the Farmer's Great Defence.

- He discharges his farm mortgage through the Mortgage Liberation Protocol.
- He recoups credit year after year through the Infinite Money Protocol.
- He shelters his land in a Private International Trust with fee simple title.
- His farm is declared church land, an auxiliary ministry of the Republic of Old Souls.
- As a Church Envoy, he is no longer bound by UK statutes or government overreach.
- Agenda 2030 cannot touch his farm — government entry would be trespass.

Ian has no debt, annual recoupments, and unassailable protection. He and his family are free to farm for generations to come.

Chapter 5: Your Invitation

The Republic of Old Souls invites farmers to step into sovereignty.

- Farmers can join dedicated webinars where Iain Clifford explains the Farmer's Great Defence.
- Farmer group leaders can interview Iain on their platform or on ROS Media, receiving free access to the Great Escape Protocols.
- Leaders who introduce other farmers become Advocates, earning passive income while protecting their networks.

Conclusion

The government's game is designed for farmers to lose — through debt, taxes, and impossible legislation. But you don't have to play.

With the Farmer's Great Defence, you can shield your farm as church land, free from jurisdiction. You can eliminate debt, recoup credit every year, and secure your family's future in abundance.

Protect your farm. Protect your freedom. Join the Farmer's Great Defence today.
