LIBERTAS

THE FREEDOM SEEKERS GUIDE

THE FREEDOM SEEKERS GUIDE
TO THE GREAT ESCAPE FROM
THE MATRIX

Presented by

Jain Clifford

The President of
Republic of Old Souls.

Introduction

MATRIXFREEDOM and the Republic of Old Souls (ROS) provide a lawful, structured pathway for individuals seeking **freedom from the global control agenda** – an agenda driven by the **UN Agenda 2030**, the **New World Order's enslavement plan**, and the **AI-driven transhuman takeover**.

We exist to serve those who **see through mainstream narratives** and are committed to breaking free from systemic controls that strip away sovereignty, privacy, and autonomy. Our purpose is to empower members to **lawfully exit the Matrix** and operate within a **private, independent ecosystem** designed to protect wealth, rights, and freedoms.

Our community attracts members who are increasingly **awake** to the reality of what lies behind mainstream narratives:

- **UN Agenda 2030** is not simply a sustainability framework; it is a **comprehensive restructuring of global governance** under unelected bodies. It centralizes authority through climate policies, digital identity systems, programmable central bank digital currencies (CBDCs), and population compliance mechanisms, stripping individuals of sovereignty.
- The **New World Order enslavement plan** seeks to erode nation-state autonomy and place humanity under a **global technocratic regime**. Through debt-based fiat systems, perpetual securitization fraud, tax traps, and jurisdictional deception, individuals are unknowingly bound into **constructive trust relationships** where corporate-state entities control their energy, labor, and resources.

- The **AI and transhuman takeover** is designed to integrate humans into a **surveilled, biometric, digitally-governed existence**. Centralized AI systems, autonomous data sharing, and transhuman bio-digital convergence are rapidly closing off personal autonomy — paving the way for enforced dependency on state-controlled infrastructures.

This is why **MATRIXFREEDOM** and **ROS** exist:

To empower our members and nationals with **lawful remedies, financial recoupment strategies**, and access to a **fully independent, private community infrastructure** designed to live **free from external control**.

The Core Programs

These programs form the first phase of **The Great Escape from the Matrix** and are the gateway into full participation within our independent community ecosystem:

REPUBLIC OF OLD SOULS DIPLOMATIC SHIELD

1

Operate under **private trust law** and **international envoy status** for maximum jurisdictional protection:

- Move beyond statutory control frameworks.
- Access **diplomatic recognition** and expanded protections.
- Participate in a private global ecosystem insulated from the enforcement arms of the control agenda.

INFINITE MONEY – BANK PAYMENT RECOUPMENT

2

Recover unlawfully extracted funds from banks, charges, and fees using trust law remedies and established rights under private trust jurisdictions.

MORTGAGE REMEDY & SECURITIES RECOUPMENT

3

Collapse **fraudulent mortgage constructs** created under false presumptions and deceptive securitization practices.

- Void unlawful mortgage agreements.
- Secure **discharge of outstanding balances**.
- Recoup the **full face value of the mortgage securities** unlawfully monetized by lenders.

HISTORICAL MORTGAGE RECOUPMENT

4

Reclaim losses going back as far as **2001**, targeting **systemic fraud** within the securitization framework:

- Expose securitization-based **double-dip accounting schemes**.
- Recover the **face value of historic mortgages** misappropriated by financial institutions.
- Restore control of estate-based equity and trust-derived entitlements.

INTERNATIONAL PRIVATE TRUSTS – MULTIGENERATIONAL ASSET PROTECTION

5

A key component of MATRIXFREEDOM's strategy is the **creation of private international trusts** that:

- **Hold fee simple title** over high-value assets, ensuring members are **separated from direct liability** and exposure.
- Allow members to **operate as beneficiaries**, maintaining full use and enjoyment of the assets while avoiding statutory claims and control frameworks.
- Enable **multigenerational wealth transfer**, bypassing probate, tax traps, and confiscatory regimes.
- Mirror structures used by **ultra-high-net-worth families** and elite institutions to lawfully preserve wealth, sovereignty, and control across generations.

This trust infrastructure integrates seamlessly with **the Freedom Plan**, ensuring assets remain **private, protected, and beyond the reach** of external authorities.

The Freedom Plan

Once members complete the **Core Programs**, they gain access to our **Freedom Plan**, a fully independent, self-reliant ecosystem designed to operate securely **outside global control mechanisms**.

PILLARS OF THE FREEDOM PLAN

Independent Energy – Private, sovereign energy solutions enabling **off-grid resilience**.

Independent Water – Atmospheric water generation, private wells, and **secured community access**.

Independent Food – Sustainable production systems designed to ensure **food sovereignty**.

Independent Health – Access to **alternative health frameworks** outside centralized medical controls.

Gold-Backed Private Currency – A **tradeable internal currency** pegged to gold, exclusive to our members.

Independent Communications – Secure, encrypted communications infrastructure, free from surveillance and censorship.

Marketplace of appropriate vendors providing products and services to members and nationals.

Fully Facilitated Programs – No DIY Templates

One of the most powerful aspects of MATRIXFREEDOM and the Republic of Old Souls is that **all four core programs are fully facilitated** for our members and nationals. Unlike many so-called “freedom” solutions that simply sell templates, downloadable kits, or do-it-yourself instructions – leaving individuals to navigate a minefield of legal and administrative complexity – **we handle the entire process on your behalf.**

From start to finish, our expert teams manage every step, ensuring compliance with the relevant trust, commercial, and international frameworks. This not only removes the overwhelming burden of trying to figure it all out alone, but also **maximizes the success rate** of securing remedy and protection.

Freedom seekers are often exhausted by “self-help” programs that promise solutions but ultimately demand that you become your own lawyer, trustee, and administrator. **We are different.** Our systems, strategies, and support infrastructure have been designed so that **you don’t need to learn complex legal constructs or decode centuries of hidden jurisdictional traps** – because we’ve already done it for you.

This is one of the **biggest attractors** for our members and nationals: **complete facilitation, zero guesswork.**

Why This Matters

MATRIXFREEDOM and ROS are **building parallel systems**. While the control agenda accelerates towards global centralization and enforced compliance, our ecosystem empowers members to:

- **Escape financial entrapment** created by securitization, jurisdictional fraud, and unlawful contracts.
- **Reclaim estate rights** and convert previously hidden value into private wealth structures.
- **Live independently**, supported by community-driven systems for resources, currency, communications, and jurisdictional protections.
